

Barrington Bank

*Barrington Bank
Barrington, Illinois*

A 18,500 square foot two story banking facility with full basement. The structural frame is precast hollowcore slab floors and roof supported on a structural steel frame. But the exterior is detailed in traditional wood clapboard siding with pilasters and cornice to meld into the surrounding community in downtown Barrington. Atop the roof slab is a light gage framed shingle roof complete with turret that conceals the building's mechanical units behind traditional lines.

*Owner: Barrington Bank & Trust Co.
Architect: Grund & Riesterer Architects, Inc.*
