

LaSalle Bank - 30th and Kedzie

LaSalle Bank - 30th and Kedzie Chicago, Illinois

TSG provided design of an efficient structural system for a new 7,000 square foot branch bank with a four lane drive through canopy. This building was located on a site which required environmental remediation. TSG used its knowledge of construction economics to develop an economical foundation design. TSG also worked closely with the architect to address all the aesthetic requirements. TSG has provided such services for a variety of similar projects including banks, shopping centers, outlet stores.

Architect: Macondo Corp.

The Structural Group, Ltd.
