

Palatine Metra Station

Palatine Metra Station, Palatine, Illinois

A new 5,000 square foot train station with cathedral and vaulted ceilings, a clock tower, and a landscaped plaza. The building functions as a train station during the day and a community center in the evening.

Architect: DLK Architecture, Inc.

The Structural Group Ltd.'s creative framing systems allowed the architect to create a highly sculpted interior volume with cathedral ceilings and intersecting arching vaults from a series of intersecting roof gables changing the space from ordinary to extraordinary.
